Just another college guy who fell in love with developing cognitive applications. Hates sitting in class and boring lectures. Loves experimenting with code, teamwork and challenging opportunities.

Have developed applications across different domains, platforms and frameworks, also have deployed and maintained the same on servers. Has good knowledge and experience on building RESTful API's, ORM and component based development. I am definitely not the best, but try me!!!

EXPERIENCE

Cyces Technologies, Chennai - *Full Stack Developer*

MAY 2019 - PRESENT

Project urls: *http://jarvis.cyces.co/*

  Thio (in process)

- Creating applications according to the given design.
- Understand the client's need and work accordingly.

EDUCATION

Hindustan Institute of Technology and Science - *B.Tech CSE*

2017 - present

Madras Christian College Higher Secondary School - *HSC (12th grade)*

2016 - 2017

Madras Christian College Higher Secondary School - *SSLC (10th grade)*

2014 - 2015

BSS Computer College - *Diploma in Multimedia and Hardware Networking*

2013 - 2014

ACHIEVEMENTS & INVOLVEMENTS

- Involved in inter and intra cultural events, competitions and hackathons and have won prizes.
- Willingly participated in workshops and have conducted a seminar on "The Art Of Developing Applications" for my juniors.
- Presented papers on "Improving Solar Panels Using Quantum Dots" and "Improving Mental Health Using Chatbot" on a symposium and IBM ICE Day 2019 respectively.

I am a self taught programmer. I worked for experience rather than a certificate. I don't have any certificates to prove my skills but I do have the experience, knowledge and the projects.
